

Peace Paradigm Shift and Joshua Syndrome¹

Noh, Jong Sun (Yonsei University, nohjong@chol.com,)²

A.

Beat your plowshares into swords and your pruning hooks into swords. Let the weakling say, "I am strong!" (Joel 3:10). P.1273.

But the Egypt will be desolate...because of the violence done to the people of Judah.(Joel 3:19)³

B.

He (*God) will judge between many people and will settle disputes for strong nations far and wide. They will beat their swords into plowshares and their spears into pruning hooks. Nation will not take up sword against nations nor will they train for war anymore. Micah 4:3. P.1294

The two verses look contradictory, but there are solutions in the context of the peace making by the weak. That is the paradigm shift for the weak.

1. Political Culture⁴

The sense of the political culture in North Korea has been the issue of life and death under the slaughtering atrocities by Japan since 1894-1945, and the phobia and the reality of the possible preemptive attacks with nuclear weapons in 1950, 1953, 1968, 1994, and on, and the international economic sanctions, ended up the millions of people died of hunger, particularly in 1996-2000.

Rev. Kang Youngsup, the chair person of the central committee of the Korea Christian Federation in North Korea, the only protestant head organization, with strong background culture of Presbyterian traditions, said, in Tokyo International Conference for Peace and Justice in Northeast Asia, that some 3.5 million people, in fact, died of hunger since 1996.

¹ Joshua of the Old Testament invaded in the Ai city and slaughtered all the people from the baby to the old according to the will of God. Some Christians or pseudo-Christian claim in the 21st century, that they have the right to slaughter the muslims, and non-Christians in the middle east and other part of the world, like in Vietnam, Afghanistan etc, and they have the psychological disease by the name of "Joshua Syndrome". Noh, Jong Sun, The Story God of the Oppressed: Preventive Economy and Joshua Syndrome, Seoul, Hanul, 2003.

² Noh Jong Sun, professor in Christian Social Ethics, Yonsei University, Korea. Ph.D. from The Union Theological Seminary in the City of New York, M.Div. from Harvard, Research Fellow at Yale, author of 5 English books and 5 Korean books on peace strategies.

³ Holy Bible, New International Version, Seoul, Korean Bible Society, 1992 pp.1972ff.

⁴ This paper has been modified from my previous articles and books.

The politics is the culture in a form of political music, political mass games, political singing, dancing, paintings, arts, calligraphies, cheering with dancing of half million on the streets of Pyongyang. The formation of culture and the cultural activities is to cheer up the spirit of the people to a goal of solidarity in the system as a whole, one strong fortress against the invading forces of outside.

The political culture of North Korea is to glorify the people's struggle for self-reliance, subjectivity, and creating their own destiny by themselves, the Juche.

The slogans are 'reunification of the motherland,'(Jogug Tongil, 조국통일).

The statements of the summit in October 4, 2007 show the determinations for both North and South for economic cooperation and prosperity, which would eventually prevent another war, the big war like Vietnam War of couple of millions death and the devastations of every part of Korea, possibly by the nuclear weapons and the preemptive attacks. Preemptive attack has been suggested by the Senator McCain, ㄱ presidential candidate for the Republican Party,USA, the former secretary of Defense, William Perry, Ashton Carter, The Democrat, former chairperson of the Asia Pacific Committee of the House, Steven Solarz, and former Prime Minister of Japan, Abe, etc, etc.

North Korean political culture is to defend themselves from the preemptive attacks.

2. Beyond Economic Culture under the General's Birth Day

2.1 One US dollar and 2.16 Won.

What is the exchange rate of one US doallar to Won in North Korea? It was the same number of the birth day of Kim,Jong Il, 2. 16, February 16. The capitalism of exchange rate is under the perfect control of the loyalty to the communist charisma of the General. Remembering the birth day, 2.16, is more important than the exchange rate of the day in the market economy of the world. Globalization of free market did not effect the exchange rate in North Korean economic culture.

In 2007, you ask the cashier in the department store in Pyongyang, she will check the table first and then tell you that today's rate is 158 Won to one dollar, or yesterday it was 160 won. In 1992, there was a new law on the economic reform for adopting the new global economy It was another revolution, not quite a reform and

opening up the society to the world(개혁 개방). But they do not forget the charismatic leadership of the General in the new economy. If you ask what is the black market rate, then she would be angry and stare at your face and then may like to say that "Why do you ask that kind of offensive question?". Because it is the question on the identity of the pride of the nation state, and the matter of national security.

Now today if you ask the same question as a tourist in Pyongyang, she would have a nice smile to you and tell you, please enjoy the beautiful show, Arirang. This is the diversion to your question, and teaching you to be more respectful in etiquette and learn more of the socialist culture of human relationship and human relation skills. Undergirding psychology of the cashier is to tell you that 'please respect us, and we have the highest and the best morality in world'. The cashier is an ambassador to make a friendly relation with American.

Some say that one hundred dollar is 340,000 won now in the free market. But it is not possible to prove it. Some say that the most expensive 'Rangmyun', cold noodle is 2,000 won, and the cheapest one with corn, is 200 won.

You ask to the waitress, "How much is your salary? 10,000 won? , The answer is 'Government provide it exactly as much as I need it.'

North Korean official exchange currency is Euro. Not because, North Korea hate American dollars, but because of the US economic sanctions. North Korean have terrible difficulty with the banking system of the US in particular and global banking in the free market economy with the supremacy of the US currency. But now EU seems to win the game against the mono-polar 'dollar' culture of economy in the world.

Alan Greenspan knows it in his book, *The Age of Turbulance*(2007). North Korean choice of Euro is not because of the psychological hatred as the axis of evil and the outpost of tyranny, but because of the efficiency for survival. Greenspan said that he supported George W. Bush on his Iraqi War policy for oil.

There has been total sanctions against North Korea, except military invasion under UN Resolution 1718.

You have to carry one million dollars in a computer bag, without any guard from North Korea to other country, risking your life, for your business deal. Because of the sanctions on International Banking after the PTSD of 9.11.

Reinhold Niebuhr said that the children of darkness is better in the final

judgment, than the children of light.(Reinhold Niebuhr, The Children of Light and The Children of Darkness: A Vindication of Democracy and a Critique of Its Traditional Defense, New York, Charles Scribner's Sons, 1944,1972).

"Children of this world are in their generation wiser than the children of light."(Gospel according to Luke, 16:8).⁵

"I tell you, use worldly wealth to gain friends for yourselves, so that when it is gone, you will be welcomed into eternal dwellings. 16: 9)

3. Dependence, Independence, Interdependence and new slavery

The vicious cycle is that dependent people fight for independence, which later regarded as the demonic power of self-alienation, but the practical people choose the way of interdependence, and ended up being manipulated by the powerful. They become practically, the puppet, and or the covert dependent slaves.

The super power, new colonialist countries say that the interdependence is the rational and ideal solution, over against the independence, in the world, and the ideal goal to be pursued.

But the enslaved, the weak and the slaughtered, say that the revolutionary independence is the solution and the ideal goal, because of their experiences of being oppressed and slaughtered, and exploited by the convert new colonial powers among the interdependent powers. The super power countries need the conversion and the transformation of their worldview and the values. It is not the matter of compromise.

This is the bases for peace in Korea and in the world of oppression and alienation.

4. James Laney and the liberation for peace in Korea.

1.His contributions, the best of the best, yet.

When he was sophomore of Yale University, he was drafted in 1945 and came to Korea as a counter intelligent, and he came to Yonsei University as a missionary and an associate professor in 1958-1964, President of Emory University for a decade and he was an US Ambassador to Korea in 1993-1997. When Clinton

⁵ Reinhold Niebuhr, The Children of Light and The Children of Darkness: A Vindication of Democracy and A Critique of The Traditional Defense, New York, Charles Scribner's Sons, critiquing on the Christian egoism, based on this Bible verse.

administration, allegedly, had a plan for preemptive strike, or surgical strikes on 5 megawatts nuclear test reactor in North Korea, he managed the negotiation for Geneva Agreed Framework with Jimmy Carter's visit to Kim, Il Sung. As a methodist minister and a Christian ethicist of personal ethics, his contribution for peace in the nuclear crisis of millions of potential killing is definitely a great one. But there seems to be some problems, yet.

2. His limitations as an American for denuclearization of USA.

In New York Times, Op-ed page article,(Oct. 8, 2007) he said that the plutonium and the nuclear bombs in North Korea should be controlled by China, for peace.

"To break the impasse, we propose that China, North Korea's closest remaining ally, assume physical custody in North Korea of fissile materials. This would ensure that North Korea does not use it to make additional bombs , send it to another country for safe-keeping, or sell it to the terrorist organizations for much-needed cash."

But his concept of peace is for the interest of the US. The people in North Korea would not agree with it, rather, North Korean may like to say that his concept is for interest of the empires.

I believe that the US should be nuclear free country first and disarm the nuclear weapons of the some 10,000, including hydrogen bombs of massacres, like W88, which has a capacity of killing almost 70 million people with one bomb. USA has some 20 of them in the fields as of year 2007. USA and Russia have the capability of killing 20 times of the total population of 6 billion in the contemporary world. All those nuclear weapon-haves should disarm their nukes, first. That is the civilized action for peace.

The primary action for peace should be denuclearizing USA, China, Russia, UK, Japan, and France and even India, Pakistan and Israel.

His primary action for the peace of the world is to liberate the oppressed, and hungry people by the way of transforming the wrong concept of demons in the minds and the hearts of the American few privileged power holders among the political, economic and military leaders of the government, the Congress, the academia and the transnational corporations.

5. Economic Cooperation and Nuclear Test.

Standard and Poors in October of 2007, evaluated South Korea in terms of investment situation, as "A" class country.

Even though North Korea tested her nuclear weapon on the 9 th October, 2006, it does not worsen the investment situation. Now, the successful summit on the 2-5 of October, 2007 made the peace situation lot better than before with proposal for ending the war in Korea since the armistice in 1953, and the plans for the ship buildings at Nampo, and Anbyun, and the peaceful common fishing ground at the west sea together, a new airway tourism at the Baekdoo Mountain, and the new invitations for the Industrial Parks at Haejoo and Gaesung, of 2,200 hecter.

South Korean government has a plan to spend for the development of North Korea with 1.5 billion dollars(1,339,835,000,000 won for 2008 in the government budget (Dong-A Daily News, Oct. 11, 2007,p.1.). But with the new president in 2008, there are extreme tensions with many problems.

6. Dependent Theology

Dependent Theology of Enslavery in the empires should be changed into Liberation theology of Peace, and the empire's 'theology of empire, and slavery' should go through the road to Damascus for conversion and Kairos.("Road to Damascus: Kairos and Conversion", in Noh Jong Sun, Liberating God for Minjung, Seoul, Hanul, 1997, index.)⁶

The captives of the superpowers has been manipulated into the theology of empires for another new captivity under the new situation.

7. History of Suffering under the Theology of Demon.

Theological immaturity of the French Priests on Korean traditional morality of respecting the parents and the ancestor as the idol worship, made thousands of the first Catholics among Korean killed by the Government of Chosun, who were desperate on national security, under the invading forces of the west and Japan.

⁶ This is one of the Kairos documents, written by the theologians of seven countries of non-G-7 countries, i.e. Namibia, South Africa, the Philippines, Korea, El Salvadore, Quatemala, Nicaragua.

This theological declaration is to tell the oppressed two third world people's perspectives, over against the first world theologies. This Kairos document was launched at the Westminster Abby in London, Allen Hall at Yonsei University, Korea, and other countries, and at the National Press Center, Washington D.C. there was a press conference, which later was published at the Washingtonpost with a full page exegesis. I was one of the presenter, and one of the respondent was Professor Harvey Cox,Jr, Harvard University.

The pope John Paul II, made an official apology on not respecting the traditional religions and the morality of the indigenous culture. The similar mistakes are the mistakes on the part of Collin Powell and George W. Bush's evaluations on the traditional values and eventually the target to bomb and to eliminate the people with different values by the military means in Iraq and Afghanistan.

Former secretary of State, USA, who are the descendent of the African, and their parents had been kidnapped by the whites and enslaverd in the America, and now they become the secretaries, not the presidents of the USA, like the case of Collin Powell, and Condollezza Rice.

It sounds like the story of Joseph, who became the prime minister, the son of the Hebrew, in Egypt. It is a great story of miracle.

Collin Powell's theological paradigm has a major problem.

The white preachers in Texas in 1800s, said that ' The Africans were created slaves by God'. It is a wrong theology of the slave owners.

Collin Powell said,

"I have few demons left, Castro and Kim, Il Sung" in 1992, at the public hearings before the Senate Committee, USA.

Demon hunting is a wrong theology on North Korean in particular and Korean in general. But this demon hunting, witch hunting theology is strong in the hearts of many people in the super power countries. They need to have a transformation of their wrong theology of demons. You demonize others , then you tend to become demons, and you actually demonize yourselves by your own evil desires to conquer, to exploit, to enslave others and to slaughter the weak by the thousands and the hundreds of thousand under the banner of the wrong concept of 'justice, democracy, freedom, which had been misused for the benefits of the powerful few. Justice, freedom and democracy of God the Creator is not to kill the weak for mundane things, or for the interests of military industrial complex of the weapons of mass destructions. You call others the axis of evil, then you make yourself the actual axis of evil. God is the only judge.

The former secretary of the State, USA, Colin Powell's theology on demon is the same kind of theological mistakes.

8. Land Reform Theology vs Empire theology in 1905-2007

North Korean Christians like Rev. Kang Ryang Wook, Koh, Kee Joon, Rev. Kim, Chang Joon etc has been developing the InMien Theology against the Theologies of the Empires. They were fighting and resisting against the structural oppressions by the ruling nobilities and the Japanese conquerors. They had a land reform in 1946, which was violent against the violence of the existing structures.

The empires and the ruling people again, repress them with new strategies. This is the cycle of violence, Violence No. 1, the structural oppression against the servants and the poor, Violence No. 2, The Revolt by the servants and the poor, and the Violence No. 3, The Repressions by the powerful. Inmien, the people in North Korea has been going through all these three stages of violence.

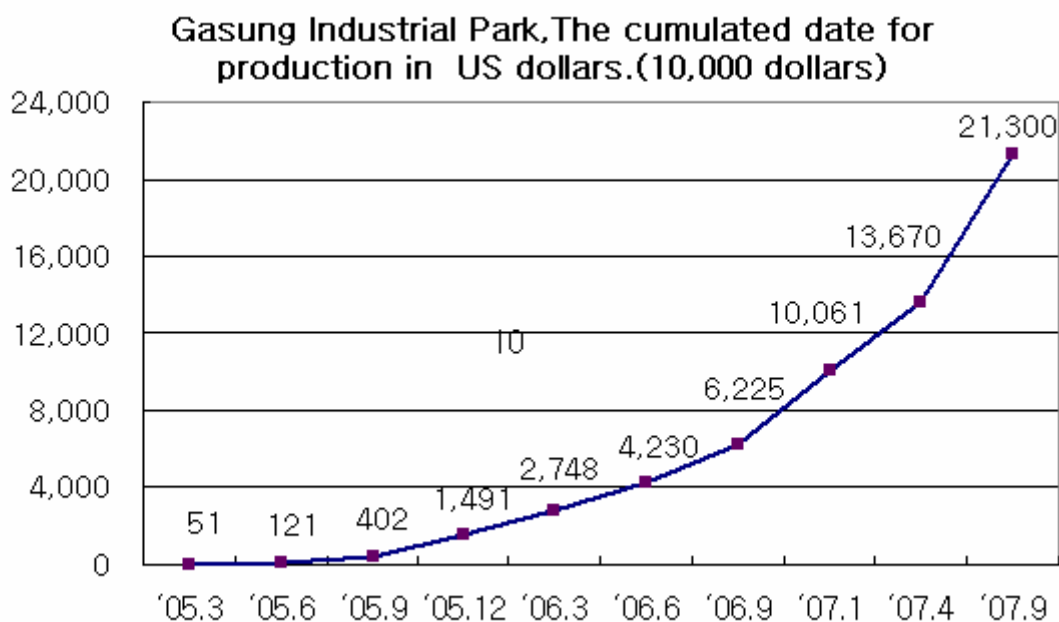

These three violence-types are in the historical struggles for liberation by the servants. For North Korean rationale, the power against them are based on the terrorism against the servants, the weak and the poor in 1905-2007.

9. Peace with Economic Reunification

According to the Korean Government statistics, Gaesung Industrial Park in North Korea, produced 200 million dollars, and some 20,000 workers, both from the North and the South are working as one. (Ministry of Unification, Oct. 2. 2007).

It took only eight months for another 100 million dollar worth production, from January to August, 2007. It took 4 years for the first 100 million dollar worth production from 2004 to 2007.

10. Resistance

Oh, Kyung Woo, Secretary of the Korea Christian Federation told me that "We will never become the servants, and slaves under the master, again", on March, 2000.

North Korean experienced the Political Culture of the Servants under the ruling nobility class until 1910, and under Japan from 1910 to 1945.

Political culture of being the colonized servants under Japan's Atrocity until 1945 Buddhist monks were a monk army of the thousands, when Japan invaded into Korea. Buddhism as a religion was a part of the resistance movements and at the same time a monk army to defend the life of the oppressed people under Japanese brutal slaughtering forces in 1592 and on until 1910, the final conquering Korea with swords and the culture-rule policy(문화통치).

The victimized people were asking for the Korean army to fight against Japan. They were asking for the military culture to organize themselves under the banner of communism, mainly in North East of China. Religion was the supporting force for the military against Japan. Arts, music, dance, literatures, novels, drama, and calligraphy, all the cultural activities were focusing on the resistance genre against the massacre, the annihilating, and the enslaving army of Japan, the colonizer.

The exploitations by Japan made the people of no food to eat and to die under the hard labor, and the military sex slavery, etc.

The psychological savior was the generals and the independence army. The army first principle became the bases of the survival of the people.

11. Nuclear Political Resistance in North Korea

Right after 9.11. 2001, George W. Bush declared that North Korea is the axis of evil and USA has a right to preemptive attack with nuclear weapons. 8 months after the statement, North Korean response was that, "More fearful and threatening thing than the nuclear weapons, we have.(핵보다도 더 무서운것도 있다.)", Kang Suk Joo said. 2002 Oct. Kelly of the USA, and Lee Keun had a clash on this wordings.

What is that? This is 'people' and 'people power' and like Arirang Collective Gymnastics, the spiritual power of Arirang.

For North Korean, they feel proud of the fact that she became the nuclear regime in 2006-7. Psychology is that North Korea has power to defend her from the nuclear-weapon haves.

Iraq began disarming herself and eventually invaded on the 20th of March, 2003, and conquered and the killings going on until today. And most of the victims are the innocent non-combatants.

Instead, North Korea went the opposite way in 2002 and in 2006, they had her nuclear test.

10. Human Rights

September 25, 2007

Text of President Bush's Remarks

By THE ASSOCIATED PRESS

Text of President Bush's remarks Tuesday at the U.N. General Assembly, as transcribed by CQ Transcriptions is the following.

"Achieving the promise of the declaration requires confronting long-term threats. It also requires answering the immediate needs of today. Changing these underlying conditions is what the declaration calls the work of larger freedom and it must be the work of every nation in this assembly. This great institution must work for great purposes: to free people from tyranny and violence, hunger and diseases,

illiteracy and ignorance and poverty and despair.

Every member of the United Nations must join in this mission of liberation.

First, the mission of the United Nations requires liberating people from tyranny and violence. The first article of the Universal Declaration begins, "All human beings are born free and equal in dignity and rights".

The followers of this violent ideology are a threat to civilized people everywhere. All civilized nations must work together to stop them by sharing intelligence about their networks, and choking off their finances, and bringing to justice their operatives.

In the long run, the best way to defeat extremists is to defeat their dark ideology with a more hopeful vision, a vision of liberty that founded this body.

Every civilized nation also has a responsibility to stand up for the people suffering under dictatorship. In Belarus, North Korea, Syria and Iran, brutal regimes deny their people the fundamental rights enshrined in the Universal Declaration.

Second, the mission of the United Nations requires liberating people from hunger and disease. Article 25 of the Universal Declaration states, "Everyone has the right to a standard of living adequate for the health and well-being of himself and of his family, including food and clothing and housing and medical care".

Finally, the mission of the United Nations requires liberating people from poverty and despair. Article 23 of the Universal Declaration states: Everyone has the right to work, to free choice of employment and to just and favorable conditions of work.

In the 21st century, this requires ensuring that people in poor countries have the same opportunity to benefit from the global economy that citizens of wealthy countries have.

The United States is committed to a strong and vibrant United Nations. Yet the American people are disappointed by the failures of the Human Rights Council. This body has been silent on repression by regimes from Havana to Caracas to Pyongyang and Tehran while focusing its criticism excessively on Israel.

America will lead toward this vision where all are created equal and free to pursue their dreams. This is the founding conviction of my country. It is the promise that established this body. And with our determination, it can be the future of our world.

Thank you and God bless. END".

The problem of this position is that the speaker do not recognize the necessity of the self-repentence, and the confession that the U.S. is violating the declaration of the human rights, in many areas, like killing the innocent people in many part of the world, and calling others the enemy and applying economic sanctions.

Max L. Stackhouse, the retired professor at Princeton Theological Seminary wrote a book on human right.

His theory on human right is not quite fair and just to the people of Korea. Not only that, his prejudice on the human right situation on the white American made him blind on what happen to the white American violation of the basic human rights of the oppressed people in the world. It is sad to see his prejudices on the non-white people in the world. *

Richard Falk, Professor Emeritus, Princeton University hits the core issues of Human Right, in his book, Enhancing Global Human Rights,(New York, McGraw Hills, 1979, p.217,) For him, a War Crime is the worst human right violation. Alan Greenspan admit the fact that he supported the president George W. Bush, because he invaded into Iraq for oil.

John F. Kenney's invasion into Viet Nam, ended when there were few million killed, and most of them were innocent civilians, and the war was based on wrong theory of 'Domino'.

The War against North Korea should be prevented now by the declaration of ending the war with peace treaty. This is the civilized way of human right protection.

11. The Political Arirang Gymnastic in North Korea

The largest gymnastic show in the history of the world, probably, is the Arirang Show with 100,000 dancers in North Korea. It is a culture for political empowerment of the people in front of the global sanctions against them. In order to win over the alienations against them, Culture is the means for political control, security and political power. Singing, Dancing, Collective gymnastics are for the national security and human security. Culture as a whole is the strategic weapon for their destiny.

Understanding the culture and ethos of the people in North Korea is the key for global peace-making and preventing the war and massacres, like the case in Vietnam, Iraq and Afghanistan. Peace with Justice can be realized in this age of turbulence, when we learn to live with dancing, singing, playing together in the feast

of Arirang Song.

Culture of Arirang, the Gymnastics(2007) is more powerful than the nuclear weapons, they say.

Center of political culture in North Korea is the resistance of the partisans against the invading forces of Japan. Japan came since 1592, and killed and exploited and raped the women, young and old by the hundreds of thousands.

"The Mass Games Production Company should be staffed with people who are unfailingly loyal to the Party and the Leader and technically qualified. And they become true communist, according to the documentary", "A State of Mind", produced by the BBC in 2003.

12. A Revolutionary Paradigm Shift

2007 Aug.15

There were <Ulchi Focus Lens Military Exercise> going on under the Operation Plan 5027 until August 31,2007.

Summit between North Korean leader Kim Jong Il and the South Korean President Noh, Moo Hyun was successful on the 28-30, in Pyongyang.

North Korea asks to cancel the military exercise and postpone it. But U.S. and South Korea made an announcement, that they are not going to cancel it.

In and around Guam, there were Valiant Shield, military exercise against North Korea, with three airplane carriers, 40 war ships and hundreds of war planes and some 7 Tomahawks, the most fearsome missile, test fired. It is one of the largest exercises since the Vietnam War. June of 2008, there were one of the largest military exercise, RimPac in the Pacific with 11 countries.

North Korea began the process of denuclearizing the country, by shutting down the Youngbyun Reactor and related facilities, and The IAEA(International Atomic Energy Agency, UN) staffs already installed the monitoring cameras.

What should be done?

The US, Japan and North Korea have a good chance to be friends and stop the enemy making each other. Victimizations and global alienations against the weak is the problems of the psychiatry in the inhumane world of today.

The psychiatry of the global disease of the killings, massacres, annihilations of the weak under the pre colonial, colonial and new colonial powers need a

revolutionary paradigm shift from their insensitive and immoral prejudices. The poor, the servants, the slaves, the outcasted, the colonized and the hungry are to be regarded as the sinners, and the axis of evil. The rich and the powerful people and the empires are to be regarded the axis of good in this psychiatrically unhealthy planet earth.

A revolutionary paradigm shift is the natural outcome for the future of humane world.

There are some policy suggestions and recommendations for the actions for just peace with love, by the party involved.

1) The US and North Korea should 'unconditionally', make a peace treaty, and or a peace regime. The first target day would be sometime before this coming December of 2008. Four parties of China, North Korea, USA and South Korea should sign on the treaty. 'Denuclearization of the nuclear weapons of the world as a whole' should be the condition as a next step after the peace treaty.

1.1) The US should eliminate the name of North Korea in the list of the terrorist countries, and or the terrorist sponsoring countries, before this coming December of 2008 by the Senate and the House. North Korea has already disabled the nuclear facilities.

1.2) The US should stop applying <The Trading with Enemy Act> to North Korea by the decisions of the new ratification of the Congress and the White House and the Treasury Department. G.W.Bush declared that the US stop applying the Trading with Enemy Act to North Korea, last June of 2008. But North Korea is still in the lists of the terrorism sponsoring countries.

The US should change the enemy relations with friendly relations with North Korea.

2) The UN, China and North Korea should make peace treaty out of the armistice of 1953. The three parties are responsible for the peace treaty.(General Clark was simply a representative of the UN Forces of the 16 countries.)

The UN(General Secretary <Ban, Ki Moon> is the responsible party.

3) North Korea and South Korea should make a peace system, or peace regime.

4) South Korea and North Korea should develop some 10 Industrial Park, like the Gaesung Industrial Park, for economic cooperation and common prosperity for economic reunification.

5) North Korea has the right to have Nuclear Power Plant for economic and human rights for life and survival. Electricity of the matter of human rights in North Korea, where many died of no food. Electricity is the basic for food productions, the heating and the industry. Perfect Sanctions against the North to have nuclear power plant for peaceful energy for the last 40 years is the critical violations of the right for life and right for minimum quality of life for survival and human right.

No one should threaten the nuclear-plant-have-nots, when they try to build the nuclear power plants for electricity, by preemption, or by economic sanction, or by demonizing them as an axis of evil.

No one should threaten them, psychologically, religiously, militarily and diplomatically and economically. It is a human right violation.

6) According to September 19, 2005 Beijing agreement, and Geneve Agreed Framework of 1994, North Korea has the right to have the Light Water Reactor. The Countries involved should supply the Light Water Reactor immediately, as promised in 1994, and September 19, 2005.

Feb. 1 2002, The US violated the Geneve Agreed Framework(1994), by threatening the preemptive attack on North Korea, Iran Iraq. It is the violation. Nuclear Weapon Haves should not threaten the nuclear weapon have nots by preemption, according to the Geneva Agreed Framework.

7) UN should lift the UN resolution 1718, before Dec. of 2008.

8) For the reciprocity, US should dismantle, completely, verifiably, irreversibly(CVID) dismantle her all nuclear weapons and the programs, together with North Korea the nuclear free world. It may not be realistic, but it is the morality of the civilized world.

Otherwise, both parties should respect their status as it is.

9) Japan should pay compensation and reparations of 10 billion Euro, to North Korea, for the sex slavery, forced laborers and the victims of the massacres during the time of 1910-1945. North Korea should consider the kidnapped victims, with one million dollars, per person, if any.

10) Before the end of 2008, Japan and North Korea should establish the normal diplomatic relations with lifting the economic sanctions without any conditions.

11) Japan should abandon some 43 tons of Plutonium(i.e. Selig Harrison), which may be turned into some 2 thousands nuclear bombs, if she would like to ask for the denuclearize North Korea.

South Korea should accumulate and acquire some 20 tons of Plutonium and some

20 tones of Uranium for future defense and energy, if Japan does not abandon her large amount of plutonium.

12) All six parties, Russia, China, US, Japan, North Korea, South Korea should eliminate all the human right violations in their countries, specially the right for the poor, and the weak. There are widening gap between the rich and the poor. The powerful eats the weak in this world of inhumanity.

13) The products of the Gaesung(개성공단) Industrial Park should be respected for export to all the countries. The US should not apply economic sanctions against the Gaesung product. North Korea is no longer a terrorist country.

14) All human beings and the nation states have the right for nuclear power energies for peace. The poor and hungry countries have the right to have nuclear power plants. No one should block them to have the plants and nuclear energies.

15) North and South Korea should have frequent summit, for economic reunification, and for the eventual political reunification to share the future of Korea.

16) North and South Korea should establish the productive and sustainable economic community, nuclear community, social, cultural, military cooperations for common prosperity and common interest for the future of peaceful recovery of one people, one language, one culture, one Korea, which has been divided by the foreign powers. 'The Strategy of Divide and Conquer' should be no longer working by the super powers in Korea anymore.

17) <Preventive Economy>⁷, preventing the war with economic strategies of developing Industrial Parks in Gaesung, Haejoo, Rajin, Anbyun, Nampo, Shinuijoo and developing economic community of North and South Korea, and the world, sharing food for feeding the people, are the key to defend the life of the people with no war of annihilations like the case of Vietnam's process of reunification after the colonial, and the new colonial and the post-colonial massacres and the devastations.

This is strategy for the ultimate protection of the human rights of the people in Korea.
This is the beginning of the peace on the world.

⁷ <Preventive economy> is the new concept, developed by me. There are preventive diplomacy, preventive medicine, preventive war. Economy is less violent means, most of the times, than the war of massacre. Therefore economy of sharing in order to prevent the killings would be the better strategy for the peace of the world. Noh, Jong Sun, Story God of the Oppressed: Preventive Economy and Joshua Syndrome, Seoul, Hanul, 2003.

* concluding words*

The USA has an ideal system: checking and balancing by the government, the judiciary and the Congress. It has been proven that this democratic check and balance system is for the benefit of the privileged few, and this ideal system does not protect the freedom, and people in many other part of the world.

The USA needs another system, with more powerful checking and balancing from the bottom of the two third world. USA's decision to support Japan in 1905, The Taft-Kastura Secret Agreement, for her conquering, slaughtering, enslaving and exploiting the people made Korea, eventually divided into two until today.

The second Taft-Katura agreement, USA-Japan military coalition may be the cause for the another sufferings of the people in North Korea.

The USA should end the war in Korea against North Korea before the end of this year, 2008. And she should lift the economic sanctions against North Korea, by eliminating North Korea in the list of the 'Country sponsoring terrorism', USA should stop applying 'Trading with Enemy Act' to North Korea.

USA and North Korea can be a good friend. US economy can be better off by the North Korea's economic development under the North South economic community.

This is the beginning of the genuine peace in Korea, and the world.

Appendix 1: Full Text of a Joint Statement Issued by Six Nations

The following is the full text of a joint statement
issued by six nations at the end of the second session
of the fourth round of talks on North Korea's nuclear
program on Monday. ED.

For the cause of peace and stability on the Korean
Peninsula and in Northeast Asia at large, the six
parties held in a spirit of mutual respect and equality
serious and practical talks concerning the
denuclearization of the Korean Peninsula on the basis of
the common understanding of the previous three rounds of
talks and agreed in this context to the following:

1) The six parties unanimously reaffirmed that the goal
of the six-party talks is the verifiable
denuclearization of the Korean Peninsula in a peaceful
manner.

The Democratic People's Republic of Korea (North Korea)
committed to abandoning all nuclear weapons and existing
nuclear programs and returning at an early date to the
treaty on the nonproliferation of nuclear weapons (NPT)
and to IAEA (International Atomic Energy Agency)
safeguards.

The United States affirmed that it has no nuclear
weapons on the Korean Peninsula and has no intention to
attack or invade the DPRK with nuclear or conventional
weapons.

The ROK (South Korea) reaffirmed its commitment not to receive or deploy nuclear weapons in accordance with the 1992 joint declaration of the Denuclearization of the Korean Peninsula, while affirming that there exist no nuclear weapons within its territory.

The 1992 joint declaration of the Denuclearization of the Korean Peninsula should be observed and implemented.

The DPRK stated that it has the right to peaceful uses of nuclear energy.

The other parties expressed their respect and agreed to discuss at an appropriate time the subject of the provision of light-water reactor to the DPRK.

2) The six parties undertook, in their relations, to abide by the purposes and principles of the Charter of the United Nations and recognized norms of international relations.

The DPRK and the United States undertook to respect each other's sovereignty, exist peacefully together and take steps to normalize their relations subject to their respective bilateral policies.

The DPRK and Japan undertook to take steps to normalize their relations in accordance with the 2002 Pyongyang Declaration, on the basis of the settlement of unfortunate past and the outstanding issues of concern.

3) The six parties undertook to promote economic cooperation in the fields of energy, trade and investment, bilaterally and/or multilaterally.

China, Japan, the ROK, Russia and the U.S. stated their willingness to provide energy assistance to the DPRK.

The ROK reaffirmed its proposal of July 12, 2005, concerning the provision of 2 million kilowatts of electric power to the DPRK.

4) Committed to joint efforts for lasting peace and stability in Northeast Asia. The directly related parties will negotiate a permanent peace regime on the Korean Peninsula at an appropriate separate forum.

The six parties agreed to explore ways and means for promoting security cooperation in northeast Asia.

5) The six parties agreed to take coordinated steps to implement the aforementioned consensus in a phased manner in line with the principle of "commitment for commitment, action for action."

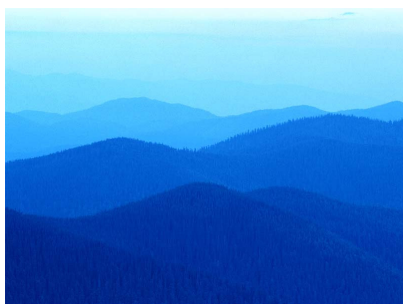

6) The six parties agreed to hold the fifth round of the six party talks in Beijing in early November 2005 at a date to be determined through consultations.

Appendix 2

Noam Chomsky on Nuclear Proliferation and North Korea.

"As far as Western concern about nuclear weapons goes, obviously it's highly selective--like, nobody cares that the United States has nuclear weapons, nobody cares that Israel has nuclear weapons, they just don't want them in the hands of people we don't control, like North Korea. And I think that's really the main issue behind the controversy these days." Peter R. Mitchell and John Schoell, *Understanding Power, The Indispensable Chomsky*, New York, The New Press, 2002, pp.302-303. www.understandingpower.com

Appendix 3. Food Base in North Korea and no more famine.

1. Chestnut trees of 600 million will produce some 3 million tons of chestnut and chestnut honey, enough for the famine in N.Korea on the rugged mountains with no trees, of some 16 billion M²
2. Cost some \$20 mil. US. 3 dollars for one tree planting.
3. No trees in North Korea in the mountain, because of no fuel, and floods destroy the rice, corn fields. Chestnut trees would protect the floods. (www.dongmu.org).
